To Whom It May Concern:

I am so grateful to live in America, in Utah, in Wasatch County and in Midway. I am grateful for the beauty of the valley and for the love and caring that members of the community have had for each other. I am grateful for those that have gone on before and for their hard work, planning and foresight.

Many wonderful people have moved into the valley, but some come here with a desire to change things to what they have left behind. Some want nothing but commercial so that we have more taxes, some want us to be a tourist town like Park City, some want standards lowered so that there is a place that sells liquor on every corner. Some have no reverence for those that fought so hard to protect this valley and all of America. Memorial Hill is a place to honor all of those that fought so valiantly. I had an ancestor Vernell Coleman who died in France during the First World War and many others that served in later wars.

Memorial Hill is also a place where people can go to drink in the beauty of the valley and find peace. There are other areas of Midway that would be more acceptable for a Theater, parking garage, and townhouses.

River Road and Main Street are going to be gridlock when all of the subdivisions that are already approved are completed. I hate to think of what it will be like.

Please consider another location for this project.
