Utah Regulatory Office (9250207) (NW26)

Gary and Stephanie Garner
4543 Barrington Drive
West Jordan, Utah 84088

Dear Mr. & Mrs. Garner:

Reference is made to your request for Department of the Army authorization to discharge fill material into 0.115 acre of wetlands on Swiss Paradise Lot #2 in order to construct a residence, garage and driveway. The site is located west of River Road in Section 35, Township 3 South, Range 4 East, in Midway, Wasatch County, Utah.

Your project has been reviewed in accordance with Section 404 of the Clean Water Act under which the U.S. Army Corps of Engineers regulates the discharge for dredged and fill material into waters of the United States including wetlands. Based on the information provided, it appears that your project would involve such discharges.~

Nationwide Permit Number 26, described on the enclosed information sheet, has been issued which authorizes the discharge of dredged or fill material into headwaters and isolated waters. Your project would involve work in these wetlands and is authorized under this nationwide permit. This nationwide general permit eliminates the need for further processing for discharges which affect less than one acre of the above-mentioned waters. The only requirement is that the person responsible for the project must insure that the work complies with the conditions listed on the enclosure. Failure to satisfy these conditions invalidates the authorization and may result in a violation of the Clean Water Act.~

This verification that your project is authorized by this nationwide permit is valid for two years. It is based on implementation of the proposed mitigation plan prepared by Joe Roush (Utah Division of State Lands & Forestry) dated June, 1992 for enhancement of 0.23 acre of wetlands.

James McEntire
317 Park Way West
Las Vegas, Nevada 89106

Dear Dr. McEntire:

Reference is made to your request for a wetland determination for your property located north of Swiss Paradise and west of Memorial Hill in Section 35, Township 3 South, Range 4 East in Midway, Wasatch County, Utah.~

Your project has been reviewed in accordance with Section 404 of the Clean Water Act under which the U.S. Army Corps of Engineers regulates the discharge of dredged and fill material into waters of the United States including wetlands. Based on the information provided and an onsite inspection by Ms. (b) (6) of my staff, this site does contain a wetland area. We have enclosed a copy of a map showing its location. A Department of the Army permit would be required to place fill in this wetland.~

The wetland boundaries may change depending on permanent changes in the hydrologic regime. This wetland mapping is valid until May 31, 1995.~

Thank you for your interest in our nation's water resources and we would appreciate receiving information about other anticipated projects. If you have any questions, please contact (b) (6) at the Utah Regulatory Office, 1403 South 600 West, Suite A, Bountiful, Utah 84010 or telephone (801) 295-8380.

Sincerely,

(b) (6)
Chief, Utah Regulatory Office
