

To all Water users on the Midway Irrigation system.

Starting September 16th, most water rights covering our water use end for the season. Midway Irrigation has enough to keep our systems pressurized with limited use therefore, effective immediately:

1. All lawn irrigation should be reduced to once per week.
2. All farmer irrigation ends except:
 - Pastures that are being used for grazing.
 - Land preparing for fall cultivation.
3. New landscaping projects should be started with caution. We cannot guarantee enough water to get your plants started after the 16th.

Midway Irrigation will be conducting major repairs in preparation for next summer's irrigation season. Some of them will require sections of the system to be shut down for a period of time and can happen at any time. Please call Midway Irrigation with questions about scheduling.

We appreciate the cooperation by all of you who reduced your water use during the summer. It really helped. Now we all need to prepare our minds for snow.

Thanks

Mike Kohler

Midway Irrigation.
