6 November 2018  
Work Meeting

Dutch Draw Subdivision /  
Culinary Water Will Serve Letter

# Memo

---

Date: November 6, 2018  
To: Midway City Council  
From: Michael Henke  
Re: Dutch Draw Subdivision culinary water connection petition

---

Jeremey Pope has requested culinary connections to the City's water system though his property is not located within the Midway City limits. His property is located at on the northeast corner of the intersection of River Road and Dutch Canyon Road. The property is 5.63 acres and will contain three lots, if approved by Wasatch County. A concept plan for the proposed subdivision is attached. The property is located outside of the city limits, but an existing city water line is along the frontage of the property. The Water Board did review the proposal but did not make a recommendation regarding the City providing culinary connections to the property.

This City is left with some items to discuss. The first is; does the City want to supply water to properties in the County that could annex into the City. The City has already decided this property should be annexed because it is in the annexation declaration the has been established. If water connections are granted now, then the City loses practically the only leverage the City has to require annexation. Once water is supplied then that leverage is lost. The parcel does border the City, so it is very possible to annex the property before granting any culinary connections. The second issue deals with controlling planning of the proposed subdivision. For example, if the property is approved by Wasatch County, a 30' setback is the minimum required. If the property is developed in Midway City, then a 100' setback is required which helps is maintain the open a rural atmosphere that we are trying to maintain in Midway. The third item is regarding infrastructure improvements. If the property is developed in the City, then water lines and sewer lines would be extended north along River Road. It is unknown if the County would have the same requirements. Finally, if the property is not annexed then it is less likely that other properties to the northeast along River Road will annex. This limits the City's ability to grow and control the entry corridor to the City. These items should be considered as part of the discussion to supply culinary water to the proposed development.
